

EACH DAY BRINGS NEW SURPRISES IN OUR SHOE DEPARTMENT

Each day brings right from the fashion centers some new style or idea in women's high-grade footwear.

Two unusually beautiful lines of women's shoes have just been received, to which we call your special attention.

One last is a very exclusive all black vici kid button shoe, with the fashionable 8-inch top. This is a big value at\$5.00

Another very attractive number is a rich black kid with white serge trimming, in the 8-inch top style. This line we have priced remarkably low at\$5.50

Dozens of other new, snappy ideas are now on display, and all at Clark prices—lower.

Clark's

CYCLO-STORMOGRAPH GIVEN BY MAYOR TO ACADEMY

The first weekly assembly of the Weber academy student body and faculty was held yesterday, when the school was visited by Mayor A. R. Heywood, City Commissioners Miles L. Jones and Chris Flygare, and President David O. McKay, Vice President Lewis W. Shurtliff and Treasurer John Watson of the Academy board of education.

The main object of the visit of Mayor Heywood, aside from a desire to become acquainted with the school, was to present to the institution a cyclo-stormograph, an instrument used for the forecasting of weather conditions. On behalf of the donor, the presentation speech was made by Commissioner Jones, who stated that while this was the first time the mayor had contributed to the equipment of the academy, he had always befriended the school when the opportunity had presented itself.

Principal James L. Barker accepted the instrument in behalf of the student body, faculty and patrons of the school, thanking the giver for his material manifestation of interest in its upbuilding.

At the request of Principal Barker, Mayor Heywood addressed the as-

sembly, the theme of his remarks being "General Education."

"We should always be students," he said, "students of nature as well as books, for the well-equipped scholar is he who is observant both in the school room and in the out-of-doors." He also said he was a firm believer in education and urged his young hearers to make the most of their opportunities to acquire knowledge.

The three officers of the academy board of education present also made brief talks, reminding the students of the high standard of scholarship and character set by the academy in past years and saying that the same standard was to be upheld this year and in the future.

MUSICAL COMEDY AT ORPHEUM

A rollicking musical comedy with pretty girls a good comedian catchy music and lots of fun headlines the new bill at the Orpheum opening today for three days. Its a great Funstage show for Orpheum patrons this week and the largest houses of the season is looked for by Manager Goss. On the same bill is one of the largest and most wonderful troupe of trained parrots and tropical birds ever seen in vaudeville. This feature is well worth bringing the children to see. Miss Mabel Nanyon has spent years in training her pets. The other acts are away above the average and makes up an excellent show. There will be two performances tonight, 7:30 and 9:15.

UTAH TO DRAW FROM ALL OTHER NATIONS IN EDUCATION

Reviewing the relation that has existed between the Utah Agricultural college and the people of Utah in the past, interpreting the tremendous influence for good that this institution has had upon educational development in the west, and forecasting the trend of educational advancement in the future, President E. G. Peterson delivered a telling address before the assembled students of the Utah Agricultural college, at their first chapel exercises. President Peterson spoke as follows:

"By federal and state law and with due regard to the orderly development of the state's education in all its departments the Utah Agricultural college occupies exclusively four distinctive divisions of education in Utah: First, agriculture; second, home economics; third, agricultural engineering and mechanic arts, and fourth, commerce and business administration.

"These are the pillars upon which the college rests. These courses differentiate the college from the other important divisions of the state's education and admit of the college co-operating with sister institutions in a most cordial way in the development of the whole business of education of Utah.

"The history of the college is a history full of initiative and educational foresight. From the time of President Sanborn to the time of President Widtsoe the college has been a leader in education in the west. To President Sanborn we are indebted for the wise and broad foundations which have made the college such a moving factor in its sphere. Under Presidents Paul and Tanner the institution maintained and developed its particular leadership. President W. J. Kerr developed the institution tremendously during the seven years he held office. Under him the courses were broadened, the plant much enlarged, and the institution given a new and vigorous spirit. President Widtsoe contributed as much or possibly more than all others, except Sanborn, in giving the institution that high position of influence which it now occupies. He increased the scholarship of the faculty to the point where it compared favorably with any similar institution in existence.

"It is the desire of the college to build upon the records of these broad visioned men who have led it in the past by magnifying its particular field of agriculture, home economics, agricultural engineering, mechanic arts, and commerce and business administration—the field which it has come to occupy after an interesting development. To the other higher institution is delegated work in medicine, law, liberal arts, normal work, and technical engineering.

"One of the most important developments of the near future will be along the line of making even more practical the work of the college. The time will come in the very near future when there will be in yearly attendance here not hundreds but, in the aggregate, thousands of the creamery men, wool growers, stock feeders, carpenters, blacksmiths, mechanics, canal managers, housewives, fruit growers, beet growers, gardeners, hog raisers and the many other practical workers of the state for a few months of each winter for extended laboratory work designed to perfect them in their vocations which have come, under stress of our industrial development, to be so tremendously important. We will occupy this great field of the purely practical without sacrificing one whit of our leadership as an institution of higher learning.

"We will absorb the best from the

great German system of education which has made Germany of the world's master in many of the arts of peace, the world's master manufacturer, chemist, builder, merchant, technician and tradesman all down the line, and the world's master likewise in much that has to do with pure intellectual vigor and resourcefulness. We will fashion after the great schools of Denmark which have made in one generation this modest little nation the best educated and the most prosperous in the world. And we will draw from all other rich sources—Australia, New Zealand, England, and France. We will continue to do our share toward making Utah what is, without boasting, her practical opportunity to lead the world in building a rural civilization on the highest grounds of intelligence, morality, efficiency in the necessary arts of man and genuine up-standing democracy.

"Education in the state is thriving. All the institutions are in peaceful counsel planning a bigger and more prosperous and enlightened Utah, and not primarily bigger educational institutions. We want a greater Utah first. The college gladly joins with all to build in harmony the civilization of the state having full faith that those who have built Utah from a dry, barren waste—the Mormon pioneers—and those who are now coming in increasing numbers to build the state, represent the advance guard of the world's citizenship."

BOLT OF LIGHTNING STRIKES A MAN ON A HORSE

Although he was completely disabled, officials of the Ogden district forest service anticipate the complete recovery of Carl A. Mattson, supervisor of the Fishlake national forest in Utah, who was struck by a bolt of lightning on last Sunday.

At the time of his injury, Mattson, in company of D. M. Adair, a ranger, was completing an inspection trip over the forest. The bolt, which came without a preliminary violent storm or rain, killed the supervisor's horse, stunned the ranger and knocked his horse to the ground. The ranger was the first to regain consciousness, when he went to the relief of the supervisor who lay partly under his fallen horse.

The supervisor is now at Salina headquarters of the Fishlake forest. It is stated that he will be under care of a physician for some time.

'THE UNWRITTEN LAW' IS GREAT PICTURE

Another big smashing success in motion picture has been secured by Manager Goss of the Orpheum for a showing in Ogden next week in the presentation of "The Unwritten Law" featuring the great emotional actress Beatriz Michelena. This picture has been playing to a wonderful business in the larger cities and largest theaters throughout the country. Its in seven reels and finishes with a wonderful climax. In Denver it played to larger business than "Where Are My Children?" which is a record in attendance. The story is one that is vital to every home. The ruining of a man's family by the other man, his death, and trial of the suspected man who brings in "The Unwritten Law," to plead his case. Owing to the length of the picture only two performances each night will be given 7 and 9 p. m. with one matinee daily. The picture will play four days beginning Sunday night, September 24th.

BATTLE RAGING ON THE STOKHOD

Germans Assume the Offensive and Lose Six Officers and 687 Soldiers.

Petrograd, Sept. 21.—Via London, 4:30 p. m.—German troops have assumed the offensive against the Russians on the river Stokhod in the region of the Kovel-Rovno railway line in Volhynia says the official statement issued today by the Russian war department. The attacks were repulsed by the Russians. In the region of Svinlusk and Korytniza the Russians captured six officers and 687 Germans and fighting is still in progress.

The statement follows: "Western (Russian) front: On the river Stokhod in the region of Kovel-Rovno railway line the enemy assumed the offensive at some places, but everywhere was repelled by our troops. In the region of Korytniza and Svinlusk fighting is proceeding and here we have made prisoner six officers and 687 men, all Germans. "Our battle aeroplanes made a raid over the region of Lockoch, Rogivichi and Makorichi and successfully dropped bombs on enemy wagons and bivouacs. One enemy having engaged us was injured and fell.

"Carpathians: In the region of Panther mountain our troops captured an enemy position on one of the heights. Here we took one officer and 473 men. We also captured six machine guns and a great number of arms and cartridges. "Caucasian front: Our detachments dislodged Kurds from the Komchanud mountain ridge southeast of Mush. We are experiencing fog and snow in our positions and in some places fierce snow storms are raging."

All quitters, cowards and yellow streak folks are warned not to see "The Quitter," starring Lionel Barrymore, of yellow streak fame, at the Utah today and tomorrow. "Mysteries of Myra" last time today.

NAVAL OFFICERS INSPECT COASTS

Board to Decide If New Yards Are Needed and Decide on Sites.

Washington, Sept. 21.—A commission of five naval officers headed by Rear Admiral Helm began studying today the question of whether additional navy yards or stations are needed in the Pacific coast and on the Atlantic south of Cape Hatteras. Several weeks will be devoted to the task and then, if it is concluded that new establishments are necessary, the board will inspect both coasts and determine the sites for proposed yards. The appropriation of the naval bill authorizing the appointment of the commission also directs that it report on the advisability of establishing submarine and aviation bases on the Pacific, Gulf and Atlantic coasts or in the insular possessions. This will be taken later.

Associated with Admiral Helm are Chief Constructor Capps, Civil Engineer H. H. Rousseau; Captain George W. McElroy and Commander Charles L. Hussey.

"I Want to Sleep in Comfort"

SAID a man who came into this store the other day: "I want a bed that won't rattle and that is good looking, or my wife won't have it in the house—a bed that is moderate in price, because I can't afford the expensive kind. What can you show?"

We took him to our display of the new Simmons Steel Beds which have just arrived. We showed him how the foot and head rods are electrically welded—thus doing away with nuts and bolts, which are sure at some time to come loose and rattle.

We explained that these beds are made of tempered steel tubing—so that they are one-third lighter than the old style iron

beds. This means unmarred floors and a saving of rugs.

We told him just how the enamel was applied to the steel—four coats, baked separately—so that the bed was good for a lifetime of hard service.

And we explained how his wife might choose any color she liked, or one of the smart-looking wood finishes now in vogue. Also, we mentioned the frictionless casters which insure great ease in moving. Tonight that man is sleeping in comfort in a Simmons Bed. His wife says it is the best looking bed she has ever had in her home.

That is our idea of service to our patrons. May we not serve you?
